EDUCATION

Birla Institute of Technology and Science, Pilani

CGPA: 8.32 | 2023 - Present

B.E. Computer Science | M.Sc. Economics (Dual Degree)

Salwan Public School

Class XII: 96.2% | 2023

High School

EXPERIENCE

Google Summer of Code 2025

May 2025 – Sept 2025

Metabrainz Foundation

California, USA | Remote

- Developed a listens importer tool to import Spotify and ListenBrainz history, contributing to ListenBrainz dataset exceeding 1.3 billion listens
- Improved ListenBrainz by implementing volume control and user appreciation features, fixing UI issues, and resolving multiple bugs
- Refactored codebase, modified database schema, and wrote 10+ unit tests to enhance system reliability and maintainability
- Contributed to ListenBrainz and MusicBrainz via 12+ merged pull requests (3000+ lines of code in total)
- Received commendations from project maintainers and community for high-impact contributions and code quality

Summer Intern

July 2024 – Sept 2024

LEAD School

Gurgaon, Haryana | Remote

- Worked on developing assessment builder being used by over 8000+ schools
- Developed and enhanced frontend components using Material UI, React, and TypeScript
- Collaborated with design team and translated Figma designs into responsive and high-quality components

PROJECTS

ComplianceAI | *Reflex, Django, Azure AI*

[Demo Video](#)

- Developed a tool for banks to accurately comply with the latest RBI regulations using Reflex, Django, Azure AI, and RAG
- Secured 1st out of 26000+ teams from all over the country in a national hackathon organized by Bank of Baroda and Microsoft
- Fetches latest guidelines from RBI's website and informs bankers about necessary changes in their policies for compliance.
- Generates comprehensive compliance reports for each account as per the KYC and anti-money laundering guidelines.

Animal Classifier | *Python, Pytorch, Jupyter Notebook*

[Github Link](#)

- Structured the dataset for classification and applied data augmentation techniques to increase the size of the dataset.
- Used some pre-trained models like AlexNet and also developed a custom Convolutional Neural Network (CNN) from scratch to address the project's unique requirements. Also used k-fold validation evaluate the model properly.
- Trained the custom CNN across multiple classification scenarios and evaluated its performance using classification matrices, ensuring consistent and reliable predictions.
- Visualized convolutional layer outputs to gain insights into feature extraction, enhancing understanding of the model's learning process and capabilities.

ACHIEVEMENTS

- Secured 1st position in the Bank of Baroda Hackathon 2024
- Successfully organized and hosted GrepCTF 2.0 at APOGEE '24, an online Capture the Flag (CTF) competition with over 50+ participants from different colleges
- Selected as Teaching Assistant by CSIS Department at BITS Pilani to assist 500+ freshmen students with lab sessions
- Ranked among the top 20 students globally in the Fedora organization during Google Code-in 2019

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript, Typescript, Java

Frameworks: Django, Django Rest Framework, React, Flask, Bootstrap

Developer Tools: Git/GitHub, VS Code, PyCharm
